

Pioneer Family Is Leaving Redcliff

Mr. and Mrs. C. E. Duffield and Family Leaving For Washington

Mr. and Mrs. C. E. Duffield have decided to leave Redcliff and move to the state of Washington where they will reside in future. As this family was one of the first to locate in Redcliff after the town started and have resided here almost continuously ever since, they will be greatly missed by their large circle of friends. The family all partially grew up here and took a keen interest in all young people's organizations.

Mr. Duffield has been engaged in the drilling business and has met with great success in any drilling operations he has undertaken. Nearly all the gas wells in town were drilled by Mr. Duffield. The review joins with them many friends in wishing this family success in their new home.

PASSION WEEK AT GORDON MEMORIAL CHURCH

The services held in Gordon Memorial church each evening during passion week were well attended. On Tuesday evening Rev. H. Magwen and on Thursday evening Rev. L. McKay were present. Both visiting ministers preached splendid sermons which were appreciated by the congregation. On Friday evening 12 new members were received.

Easter Sunday Communion service was the largest, with one exception, ever held in Gordon Memorial church. The evening congregation was also larger than usual. Special mass was rendered by the choir both morning and evening.

The attendance at the Sunday school totalled 130. Only once before was there a larger number present.

EASTER DAY AT ST. AMBROSE

The Easter services were well attended and hearty. Miss V. Cox officiated at the organ in the morning and in the afternoon, and Mrs. W. in the evening. The anthem: "They Have Taken Away My Lord, was very credibly rendered. The vest choir sang at all services and received Easter offerings. At the children's services carols were sung and at the close medals were presented for Lent attendance to Annie Shaw, Mary Brown, Gladys Taylor and James Brown.

Hector Lang, Liberal candidate, and Liberal leader, J. T. Shaw will hold a meeting here on Thursday, April 18th.

Spring Threshed Grain Not Good For Seed

Tests Show That Vitality Has Been Badly Damaged

Government tests of wheat which has been threshed this spring prove that the vitality has been badly damaged. If there is a widespread plucking of this spring threshed wheat, disastrous results will follow. The directors of the Alberta Wheat Pool are greatly concerned over the matter and urge farmers to have their seed tested for germination.

Churches

1st Sunday after Easter, April 15
Holy Communion 8 a.m.
Sunday School, 10 a.m.
Matins and sermon 11 a.m.
Evening and sermon 7:30

Tuesday, April 17, vestry meeting at vicarage, 8 p.m.
Thursday, April 18, Sunday School teachers meeting 7:30.
Friday, April 20, Evening 7:30 followed by choir practice.

GORDON MEMORIAL UNITED CHURCH

R. N. Matheson, B.A., Minister. Strangers and visitors are very cordially invited to attend the services and to share in the activities of Gordon Memorial church. Organizations meet as follows: The Official Board on 2nd Tuesday in each quarter at 8 p.m. Committee of Stewards on the 2nd Tuesday of each month at 8 p.m. Women's Missionary Society on the 4th Thursday of each month at 8 p.m. Ladies' Aid, every Thursday 3 p.m. Mission Band every second Monday at 4:15 p.m.

Sunday, April 14th.
10 a.m. Church School.
11:15 a.m. Public Worship.
Subject: Eight Days After.
7:30 a.m. Pleading Drive.
Subject: The King Who Could Not Sleep.
2:30 p.m. School and Service at Bowser.

CHURCH OF THE BRETHREN

Rev. D. Hollinger, Minister.
Usual services.

ST. MARY'S CHURCH

Celebration of Mass, Second and Fourth Sundays of each month at 8:30 a.m.

BOWELL NEWS

The C. P. R. steel gang of 350 men passed through here yesterday.

Mr. and Mrs. Calhoun left on the Monday to spend a few days in Tilley. Mr. and Mrs. A. E. Lemon and son Albert spent a few days in Bowell the guests of Mr. and Mrs. Further. At present they are visiting Mrs. Lemon's brother in Calgary and in a few weeks will be leaving for their new home in Ontario.

Mrs. Pecos and Dorothy spent the weekend with Mr. and Mrs. L. Pecos. Miss Elna Wallace, of the 1928 annual class, is doing some of the teaching at the school this week. Miss Jones expects to have another normal student the week after Easter.

This wet snow will supply the surface moisture that some of the farmers say was badly needed. Here's hoping 1929 will bring forth a bumper crop.

Mrs. E. Gundersen loaded a cart of wheat last week.

Word was received here on Saturday of the death of little Billy Quinn. Billy had been a patient in the Ochs hospital for some time. To the bereaved family the community extends its heartfelt sympathy.

Reports say that most of our bush-owners are to have housekeepers this spring. Mr. Allan Jackson is at present in Calgary picking out his.

School closed for the Easter vacation on Tuesday. It will re-open the following Thursday, April 18th. The members of the ladies Aid made their talent money. A good musical program is being arranged. Luncheon program for the admission, Adults 25c, children 10c.

The St. Ambrose W. A. spring sale will be held in the Parish Hall on April 21st. Watch for further particulars later.

Kenneth Duffield who has been taking a course in electrical engineering at Chicago, arrived home last week after completing his course and securing his diploma.

During the next two weeks we will have the privilege in Redcliff of hearing the political leaders of the province address meetings. They should all receive cordial hosts.

It's a great life if you don't waste it.

Alderson Couple Married Wednesday

Miss Inga Carlson and Mr. Jern Park-Karl Ann Bride and Groom

The home of Mr. M. Rio Carlson, seven miles north of Alderson was the scene of a pretty wedding on Wednesday afternoon, when his daughter, Inga, was united in marriage to Mr. John Hope Parkkari, also of the Alderson district. Rev. R. N. Matheson, of Redcliff, officiated.

The bride, who was attended by her sister, Miss Florence, was beautifully groomed in flesh silk crepe de chene, and wore a bridal veil with orange blossoms. She also carried a spray of Easter lilies. Mr. A. Parkkari, brother of the groom played the old of best man. When the ceremony was over and the register signed, the merry party gathered in the dining room and partook of a deliciously arranged wedding dinner.

Both the bride and groom were brought up in the Alderson district where they are well known and popular. Many beautiful and costly gifts paid eloquent tribute to good wishes of friends far and near, who accompanied the young couple to their new home.

The bride's mother is well known in Redcliff having spent two winter here while the children were attending school. Mrs. A. Duheun and Mrs. Wm. Wheeler, of Redcliff were among the wedding guests.

C. G. I. T. GIRLS HAVE SUCCESSFUL CONCERT

The C. G. I. T. concert held in Gordon Memorial church last Tuesday evening did not draw as large a crowd as some events but the program was splendid throughout. It revealed a fine development among the young people. Several numbers, both vocal and instrumental, were delightfully surprising. The little play entitled "The Wrong Baby" was full of action and humor. From the beginning to the end all the girls took their part well. The proceeds amounted to about \$20.00 and will be added to the debt and building fund of the church.

Will Hold Stampede Here on July 2nd

Various Committee, to be Selected at Meeting Next Monday

At the annual meeting of the Stampede Association called last week it was unanimously decided that the annual stampede be held this year on Dominion Day which will be observed on Monday, July 2nd. It was further decided that the present committee carry on to the new ones as a precedent at the general meeting to be held in the Legion reading room on Monday evening, April 15th. This meeting is called for 8 o'clock sharp.

As the election of officers for the year will also take place at this meeting a full attendance is requested.

During the next two weeks we will have the privilege in Redcliff of hearing the political leaders of the province address meetings. They should all receive cordial hosts.

During the

CASTORIA

Tapping Wealth Of Northern Canada

Canadian National Railway
Engineers Tell Of Rapid Development

The tremendous North of Canada, the rich country in which millions have been invested and of which millions more will be taken in especially coming into its own. The railways, which are being pushed forward with all the energy and haste men can command in a region that excites every ounce of skill, strength and speed that men can give, are bringing the wilderness closer and closer to the world. They are making possible the pricing open of a chest whose treasure is so vast that imagination scarce can comprehend it. Before the year is out the railway which is striking 85 miles northwest of The Pas to open up the Pile Plan and eventually the other rich properties in that area will be in working condition. In the meantime, all the necessary supplies will be taken in by rail and camps established along the way. By the end of next year, the Hudson Bay Railway will have reached its terminus at Port Churchill, on Hudson Bay, and the North will have a new outlet to the sea.

C. H. Gowski, of Montreal, chief engineer of the Construction Department of the Canadian National Railway, who has just returned after a visit of inspection to the northern country, declares that he is well satisfied with the progress that is being made.

"To fulfill our promise to the Dominion Ministry of Railways that the Hudson Bay line would be in operating condition by the end of next year, we must complete 84 miles from the present end of steel before we can begin to build the rest of the line," Mr. Gowski says. The present end of steel is 256 miles from The Pas, which is 482 miles from Winnipeg. From the end of steel to Port Churchill the distance is 154 miles. "It is no doubt but that this will be accomplished," he adds. "The road is broken through for the 84 miles and the contractors are busy erecting camps and getting the supplies. By the second week in February, Major J. L. Charles, who is in charge of the Canadian National Railway's logging parties, had reached Mile 100 and was, of course, still pushing ahead. He is using dog teams."

Since there are no means of communication in the summer, Blawie and Cameron Ltd., who have the contract for grading the line, are concentrating, during the winter weeks, on the task of bringing in supplies and carrying them. Mr. Gowski pointed out. Before the breakup, at least 1,200 men will have been placed and will be engaged in ditching. After the important work of drainage, comes the building of the embankment. It is hoped the truck-laying will begin by July 15. In order that there will be no delay, cutovers are being made. The first 20 miles, cedar being lacking for the purpose, and the three streams which the railway crosses are being spanned by pole trestles, which will be replaced by permanent structures later. Temporary water supply tanks are also being installed in advance of the hauling and trucking.

"Our big battle is of course, with the muskies," said the engineer, in discussing the difficulties of railroad-building in the north. "Near the Elmsworth River we are cutting 200 carloads of poles and these will be placed on top of the grade, herringbone fashion, so as to form a foundation for the ties in the soft places. Instead of burning the timber cleared from the right-of-way, the ties will be saved and used for the main purpose. Hauling will be kept close to the track all the time. There will be two cutovers."

"Two hundred men and 120 teams are now working on the north road, outside the right-of-way. Besides the men on the Churchill section, 230 men."

Expedition To South Pole

This is the "Banshee," the Norwegian ship which Commander Hjalmar E. Eide's expedition to the South Pole will use. He will also have a three-motored plane, with which he hopes to fly over the Antarctic zone.

W. N. L. 1725

The Value Of Sheep Clubs

men are engaged along other portions of the line and three work trains.

"Four headquarters camps, more than half the total number, have been erected, and others are under way. The contractors are erecting, for the railway, eight engine sheds at well, three of which have been completed. At Mile 54 from the present end of steel they are building for an engine headquarters camp of four log buildings. This will be the base for working down the Deer and Churchill Rivers for the line ahead.

"The caches I referred to are 20 miles apart, but camps between them that the men will not have to travel more than five miles. To make it easier for them, in the summer, 20,000 "duck mule," plank platforms eight feet long, will be put down in the soft places. There is no river transportation here and no timber for building a cordway road."

How Rockier Got Their Name

The Name Is Believed To Be Of Cree Origin

The name "Rocky Mountain" appears to be of Cree Indian origin. Long before the advent of the white man the Indians of the Canadian prairies, gazing at the glowering line of peaks stretched across the West, called the "Balding Mountains," according to M. Pierre in his journal, 1752, stated that among the Cree they were called "Amin-wait," that is, "Many or rocky mountains." He translated the name into French—"Montagnes des Roches"—and by the English equivalent they have since been known.

Hydro-Power On Niagara River

On the Niagara River, the water-power of which is shared between Canada and the United States, the development of six million horse-power could be developed, but by international treaty is restricted to a total diversion of the flow of the river to 20,000 cubic feet per second and Canada to 25,000. These diversions are practically all utilized by the developments now in use.

Keeping Physically Fit in Mid-Ocean

Over left-A physical drill in motion. Over right-The crew of the "Empress of Australia" are shown in the gymnasium of the ship's swimming pool. Lower left-Interior of the ship's swimming pool. Lower right-Exterior of the ship's swimming pool.

A gymnasium on board an ocean liner is no longer a novelty. The floating palaces of today which cross the mighty oceans between Canada and the Orient, and Canada and Europe, have gone much better than the best hotels. These are hotels in this country that can invite their guests to bathe in private swimming pools; but how many of them can offer the busy man or woman the use of a gymnasium?

"How to keep fit at sea?" Bears one of the famous "White Empresses" found for the Orient from Vancouver, of course from Quebec, Southampton by the "Empress of the Atlantic." These liners have gymnasiums on board, and you will have no reason to fear the consequences of a period of enforced leisure. On the Pacific the "Empress of Canada," the "Empress of Asia," and the "Empress of Russia," have gymnasiums which are in all respects like those of the three Atlantic Empresses. Spacious rooms with excellent ventilation, and fitted with the latest equipment for almost any athletic pleasure. In addition, the Empress of Canada and the Empress of Australia have swimming pools, which are in the first rank of those to be found on board sea-going ships.

"The apparatus with which the

The Value Of Sheep Clubs

Responsible For Establishing Over One Hundred New Farms In Canada Recently

Buyers and Girls' Sheep Clubs have been responsible for establishing over one hundred new sheep farms in Canada recently. They are proving a big factor in creating further interest in sheep raising and are likely to be the means of establishing thousands of sheep flocks on farms where sheep are not at present being kept.

Sheep club members have the co-operation of the Canadian Banking institutions in providing loans subject to the regulations of the policy, as such are desired. The policy is administered by the Sheep and Swine Division, Live Stock Branch, Canadian Federal Department of Agriculture, in co-operation with the Provincial Departments of Agriculture. Direct promoters in the various provinces in which the policy operates give assistance in selecting suitable live stock, give direction and assistance in equipment of buildings, feeding and management. The Canadian Co-operative Wool Growers, Ltd., Canada's national wool marketing agency, operated by the sheep raisers, ensures full market values for the wool clip. Sheep Fairs and Lamb Sales create market value, reduce marketing costs and encourage the production of better lambs. Sheep which is recognized as a branch of the live stock industry that has proved to be very profitable and is strongly recommended for consideration by prospective settlers.

Receive Big Contract

A Calgary firm, the Alberta Wood Preserving Company, has been awarded one of the largest wood preserving contracts ever given in Canada. It has an order from the Canadian Pacific Railway for the treating of 300,000 ties a year for a five-year period, 1,500,000 ties altogether. This "treating" process is said to add from 30 to 60 years to the life of the wood.

New Comer Prizes His Land

But To Many Canadian Farmers Ownership Means Nothing

No Canadian need be jealous when a European family is placed on a farm from which a Canadian family has removed itself. Yet this is what is going on in some parts of the country. The original Canadian stock is leaving the land and getting into the towns and cities. The same process is going on in many sections of the United States and is regarded with alarm by students of the social order in this country. The newcomer from Europe prizes the land; to him it is a great boon to be able to own a hundred acres. The Anglo-Saxons in this country regard the land lightly. Ownership means little to him and in many cases he would prefer making his living somewhere else.

Yukon's Healthful Climate

Continuous Daylight In Summer Time For The Twenty-Four Hours

The climate of the Yukon Territory, Canada, is characterized by a tremendous temperature and a very unusual precipitation. There is no more delightful climate than that which prevails from May 1 to October 1. The continuous light for the whole twenty-four hours, during the period from the middle of May to the first week in August, although situated in a source of delight and wonder to the visitor. While the winter is long and cold, on account of the absence of high winds and the dryness of the atmosphere, the low temperatures are borne with less discomfort than in other parts not so favored.

It Is Estimated That More Than 300 Tons Are Spoken Through The World.

Don Brichmann is a druggist, here it is not, at 241 South Burdick Street, Kalamazoo, Mich.

It sometimes pays to be good, but it is always good to be paid.

Good Crops Have Established Prosperity

Farmer's Position Has Been Greatly Improved, Says Report

"In view of the fact that the price structure has consistently favored the farmer, particularly during the past three years, the farmer in many other parts of the world has found that his sale of cotton, his load of maize, or his bushel of potatoes could be sold at a price which would enable him to buy only about two-thirds as much manufactured goods as formerly."

Since a recent bulletin issued by the Royal Bank of Canada.

"In reality his difficulties have been even greater, than this statement would suggest, since wages, rent and taxes—his costs—have in most cases increased by at least 100 per cent," continues the bulletin. "Where the individual farmer has been unable markedly to increase his production, the changing relationships of prices have reduced the purchasing power of the farmer's income by about one-half. This reduction in the purchasing of the agricultural population has prevented the expansion of world commerce to a normal level."

"The satisfactory crops in Canada and the persistences of relatively favorable prices for these products which come from Canadian farms have been important factors in maintaining prosperity. While it is true that since all of Canada has experienced good times during this period, the outstanding factor in the situation has been the improvement in the position of the Canadian farmer."

One Of Sweetest Stories Ever Told

Annual Consumption Of Sugar In Canada Is Almost One Hundred Pounds For Each Person

One of the sweetest stories ever told is contained in a recent report of the sugar refining industry in Canada issued by the Canadian Government Bureau of Statistics.

"The fact is," it tells, "that the average Canadian citizen has a sweet tooth, for the annual per capita consumption of sugar is 93.09 pounds, or the equivalent of a pound of sugar every day of the year. The total production of sugar in Canada in the year under review was 1,153,778 pounds, which 70,380 pounds was made from beets grown principally in southwestern Ontario and southern Alberta. Thirty thousand acres were sown to beets, which yielded about nine tons per acre, and for which the growers received an average price of \$3.55 per ton. The total value of the yield was \$2,538,761."

There are eight sugar refineries in Canada with a capital investment of \$40,748,040. Canada is one of the principal sugar refining countries, her net exports of refined sugar, after supplying her own requirements, amounting to about 250,000,000 pounds yearly.

Cannot Be Called Insane

People Who Fall To Control Their Impulses Have To Be Fused

It is the business of men to control their impulses. When they can do so—and possibly there are a few who can not master an impulse to murder—they are unfortunate, but not insane. The man who knows what is right and what is wrong, who knows that what he is doing is wrong, is quite sane enough to pay the penalty prescribed by law. It does not matter whether or not he is the victim of a "split personality" or is afflicted with "demonomania." These are interesting peculiarities, but they are no defense—and are not insanity.

Machinery For Hurling Football Machine To The Utmost Point

Machine at Bismarck has been purchased in England and Germany and is to be shipped before May 15th, according to the representative of the Western Dominion Cattle, who has just returned to Saskatchewan.

"My poor husband was a wonderful pilot," sighed the landlady who she looked at the pie crust, "and always said he found inspiration in my cooking."

"A sculptor, I presume," said the gloomy boarder, surveying his bent fork.

In China, according to Capt. M. B. Curtis, of the United States Marine Corps, every Chinese takes his wife to war with him. It may be a government plan to keep the boys in a fighting mood.

"Now that you are married, I suppose you will take out an insurance policy on your wife?"

"Oh, no. I don't think she's going to be dangerous."

Engineers Plan To Cool Tropical Zone

Have Evolved Scheme For Diversion Of Arctic Currents

Utilization of the icy currents which flow beneath the warm Southern seas for modifying the climate of tropical lands and rendering them not only pleasantly habitable but workable as well is foreseen by two French electrical engineers, Georges Claude and Paul Bouchard, who spoke before a meeting of the French Engineering Society at the Sorbonne.

Moreover, they asserted, the tropical seas hold vast stores of thermal energy which man may yet harness. "Often," they said, "the water of the tropical seas generally have a temperature of from 75 to 85 degrees from one end of the year to the other, as, pointed out, have, thanks to currents emanating from the polar regions, waters of great depths at a constant temperature of from 25 to 45 degrees."

Then, the aid of a shaft sunk into the sea, these cold waters could be brought to the surface, the engineers said, the result would be a surface layer of water of 10 degrees, more, very constant in all seasons and all weathers.

Of course, this could draw off the warm surface waters into a malleable vacuum, they asserted, the waters thus drawn off would begin to boil, producing a vapor which, with the aid of the cold waters brought up in the shaft, would be condensed.

And if in the current of vapor one placed a turbine, they declared, the machine would furnish energy, beyond comparison with anything in existence.

Only Sense Not Protected

Law Does Not Interfere With Things Which Offend Our Sight

If you push a man on the nose, he can have you arrested. The law protects our sense of touch.

If your factory pours noxious fumes over a city, your neighbors can get out an injunction against you. The law protects our sense of smell.

If you put even harmless chemicals beside a public highway, they can be sued for it. The law protects our sense of taste.

If you run your soapmaker at unreasonably hours, the Board of Health will have something to say about it. The law protects our sense of hearing.

But—

You can stick an ugly advertising sign beside a public highway, and in the most beautiful spot for miles around, and the law will probably protect you through the court of last resort. Why are our eyes discriminated against? Why is sight the stepchild in the family of senses?

Probably it will stay so until the majority of the people are as unamiable in their definitions of bad sights as they are in their definitions of bad smells.

Sheep Raising In B.C.

Sheep Production In Province Increased By 27 Per Cent. Last Year

The sheep raising branch of the agricultural industry is developing rapidly in British Columbia, particularly in the logged off areas along the mainland coast and on Vancouver Island, according to a report of the Vancouver Chamber of Commerce. The province increased sheep production 27 per cent. in 1927 over 1926, the latter year also having an increase of 24 per cent. over the year previous.

Doctor: "Your health is excellent, madam; I don't find anything wrong with you."

Lady Patient: "Won't you please look again, doctor? You see, all my friends are going to Hot Springs for their health."

Don't condemn a man for beating his wife until you ascertain whether he used a club or a pack of cards.

"Oh, no. I don't think she's going to be dangerous."

Customer: "No. Would you?"

Buen Humor, Madrid.
